Dear Kapil,

Dear Hiring Team,

My Ph.D. in Materials Science and Engineering focused on computational fracture mechanics of composite materials and more than 2 years as a postdoctoral fellow in computational solid and fluid mechanics and advanced fracture mechanics, along with my experience in developing and managing international research projects both as leader and collaborator, provide me with the skills to strengthen the portfolio of the Simulation Team at the Technology and Innovation Institute in a Senior Researcher capacity.

I offer proficiency in several computational methods of solid mechanics (FEM, BEM), fluid mechanics (LBM, FVM), fracture and damage mechanics (CZM, VCCT, J-integral, interaction integrals), mesh generation and computational geometry (Delaunay triangulation, Voronoi tessellation, transfinite interpolation, elliptic/parabolic/hyperbolic mesh smoothing), and statistical mechanics (MC, MD), as well as several mechanical testing methods, software and programming languages as outlined in my CV.

The opportunity of living and working in several countries has allowed me not only to become fluent in different languages but most importantly to master cross-cultural communication skills. Flexibility, adaptability, and rapid response to change are qualities that I have nurtured by navigating multiple work environments. From my Master's thesis through my Ph.D. project to my postdoctoral fellowship, I have learned to manage international research projects from inception to exploitation. Honesty, transparency, and a positive attitude towards challenges have helped me earn the trust of each stakeholder involved. The ability to communicate candidly in the workplace has allowed me to build a broad network across different countries and scientific fields.

I am eager to put my skills and experience in service of the Technology and Innovation Institute's mission, and I am confident we should arrange a time to meet. In the meantime, I wish to thank you for taking the time to consider my application and review my qualifications.

Sincerely,

Luca Di Stasio
